EDUCATION

Simon Business School Dec 2026
Masters of Science in Artificial Intelligence in Business

University of Rochester May 2025
Bachelors of Arts in Computer Science, Minor in Psychology

PROFESSIONAL EXPERIENCE

Quinn Aug 2026 – Present | New York, NY
Sales Development Representative

- Booked **12 meetings** via outbound cold calling into HVAC, pest control, and logistics verticals, with **5 of which met qualification criteria.**
- Sourced one qualified meeting that advanced to a **$30,000** sales quote, translating cold outbound into revenue-stage pipeline.
- **Built and qualified targeted prospect lists** using **Apollo, and Clay**, identifying key decision-makers based on ICP fit, hiring signals, and account research.
- Enriched, verified, and segmented contact data in **HubSpot**, maintaining CRM accuracy and enabling personalized, **multi-channel outreach campaigns.**
- Built and optimized AI Slack agents to automate follow-up sequencing, and worked across **Sakari, Orum,** and Hubspot to streamline the outbound workflow.

Simon Vision Consulting Aug 2025 – Dec 2025 | Rochester, NY
Data Analyst

- **Leading the app launch and adoption roadmap strategy** for a restaurant chain's nationwide rollout of a new ordering app across **40+ locations**, ensuring seamless migration from previous app before platform sunset.
- Conducted **A/B testing** on app UIs, identifying the highest-converting pages and **improving click-through rates by 68%.**
- Built **k-means clustering models** to segment customers by purchase behavior and demographics, enabling targeted rollouts aimed at boosting visit frequency and ease-of-use.
- Analyzed customer engagement and visit frequency using **cohort analysis in Python**, leading to recommendations that **increased repeat visits by 32% over three months.**

SEO Holdings Jun 2025 – Sep 2025 | Remote
Intern

- Reduced manual SEO research and blog update workflows by automating keyword optimization and content publishing processes using **Make and N8N, saving approximately 17 hours per week in operational overhead.**
- Built automated lead enrichment and routing systems integrating web analytics and marketing data sources, **processing approximately 20 SQLs daily** while improving inbound response efficiency.
- Developed **AI-assisted lead scoring and classification systems** using **Google Vertex AI and local LLMs** to segment inbound prospects by intent and engagement.

Kuba AI Mar 2025 – Aug 2026 | Remote
Lead Software Engineer

- Built the **UI for a B2B SaaS platform** enabling companies to create AI-powered QA personas to test their apps/websites like real users, using **React + TypeScript** for a clean, scalable interface.
- Integrated **Midscene.js** to simulate realistic user behavior and stored detailed YAML-based session reports in **AWS S3**, distributed via **Amazon CloudFront** for global access.
- Containerized the platform with **Docker** and began developing proprietary AI models using **AWS SageMaker** and **Bedrock**, improving persona realism and reducing reliance on third-party APIs.

University of Rochester Sep 2024 – May 2025 | Rochester, NY
HCI Research Assistant

- Researched and developed an **AI/ML-powered tools** to assist deaf or hard-of-hearing children in early language development.
- Implement ASL word recommendation strategies with **Stanza pipelines, BERT models,** and **part-of-speech analysis**.
- Redesigned the legacy system into a portable version with **Flask, JavaScript, and Docker** and deploy it on **AWS**, enabling remote user studies and **reducing data collection time by 1 week per participant** while **doubling user participation rate**.

SKILLS

Programming: *Proficient: Python, JavaScript* | *Intermediate: TypeScript, Java, SQL, R* | *Beginner: C++, Go, Kotlin*

Other: Tableau, AWS, PostgreSQL, Make, Clay
